The lowa Department of Public Health (IDPH) Family Planning Program provides funding to community agencies to offer medical services, health education, and information to lowans to promote reproductive health in lowa

A client from Western Iowa who is pursuing a career in health care sent the following thank you note to her provider: "Words cannot explain how grateful I am to have a caring woman like you as my provider. You went out of your way to take care of me on a Saturday. I appreciate the things you do." Family Planning services help men and women reach their educational and career goals.

A woman from Southern Iowa wrote, "I really appreciate that I have somewhere to go for a reasonable price. I am grateful to know that I was still welcome even thought I didn't have payment today."

Did you know?

In 2013, 42% of pregnancies in Iowa were unintended according to the Iowa Pregnancy Risk Assessment Monitoring Surveillance program.

Why is the Family Planning program important to protecting and improving the health of Iowans?

- There are about 330,620 women in lowa ages 13-44 that need contraceptive services. Increasingly men are seeking family planning services. Improving birth outcomes and promoting healthy families and communities are essential to promoting public health.
- The social and economic circumstances facing low-income or minority families may result in decreased access to family planning services.

almost 3 times that of non-Hispanic white teens.

- Iowa's adolescents have higher rates of unintended pregnancy, low birth weight babies, and sexually transmitted infections (STI) than any other age cohort does. The national teen birth rate for 15 to 19 year olds is 34. 3 per 1000 population. Iowa's statewide birth rate for 15-19 year olds was 20. 4 in 2014. However, there are significant differences by race and ethnicity among Iowa's adolescents. Iowa's non-Hispanic Black females 15-19 years olds experience a birth rate at almost 3. 5 times that of their non-Hispanic White peers. Hispanic teens are similar with a birth rate
- In 2015, Title X providers in Iowa served 40,910 women and 3,027 men. Almost 36,000 of those individuals had an annual income less than 250% of the federal poverty level. Title X providers also provided cervical cancer screenings, 14% of which required additional follow up for abnormal findings, 49,734 STI tests, and 4,887 HIV tests.

Promote healthy living

Strengthen the health infrastructure

What do we do?

Medical Services

- Birth control exams and supplies
- Tests and treatment for sexually transmitted diseases
- Cancer screening: pap smears and breast exams
- Infertility exams, counseling, and referral
- Tests for high blood pressure and anemia
- Pregnancy tests

Information

- How to plan a healthy pregnancy
- How to talk with parents and others about sexuality
- How to make responsible sexual decisions, avoiding reproductive coercion
- How to make a reproductive life plan

Health Education

- Birth control methods
- Reproductive health and reproductive life planning
- Self-exams for breast or testicular cancer
- Sexually transmitted infections and HIV/AIDS
- Importance of nutrition
- Effects of alcohol, drugs, and tobacco on reproductive health

Community Education

- Public speakers and educational materials
- Parent-child communication
- Reproductive health
- Birth control
- Other family planning-related issues, including HIV/AIDS and STI prevention

How do we measure our progress?

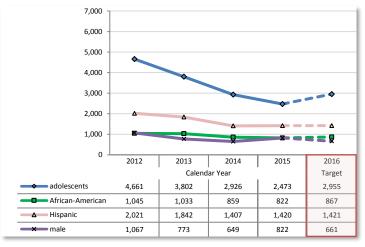

- Number of unduplicated clients served.
- 2 Number of low-income clients served (below 150% of the federal poverty level).

Data Source: Family Planning Annual Report.

How are we doing? IDPH funded family planning clinics continue to see a high proportion of low income clients.

- **3** Number of adolescents (under 20 years old) served.
- O Number of African-American clients served.
- **9** Number of Hispanic clients served.
- **3** Number of male clients served.

Data Source: Family Planning Annual Report.

How are we doing? The number of adolescent clients increased between 2008 and 2011, staying stable through 2015. The number of male clients increased annually from 2007 to 2012 and has remained stable. The number of African-American clients decreased slightly in 2014 and 2015. The number of Hispanic clients served increased to its highest level in 2012 but dropped slightly in 2013 and 2014, increasing again in 2015.

What can Iowans do to help?

- Learn more about the Family Planning Program by going to http://idph. iowa. gov/family-health/family-planning.
- Share with friends and colleagues how important it is that pregnancies are planned.
- 3. Share with friends, colleagues, and other health professionals that no-cost or low-cost reproductive health care screening and contraception is available by calling 1-800-369-2229.
